

INDRAJITH KS

Full Stack Developer | AI & Data Engineering | MERN Stack

indrajithindra55@gmail.com | [+91 9995395324](tel:+919995395324) | Bengaluru, Karnataka

linkedin.com/in/indrajith-ks-40aa62227 | github.com/indrajithkss

PROFESSIONAL SUMMARY

MCA graduate (Masters preferred — JAIN Deemed-to-be University) specializing in Full Stack Development, AI/ML integration, and data-driven application engineering. Hands-on experience building end-to-end web applications using React, Node.js, Python, and MongoDB, with practical exposure to machine learning frameworks (Scikit-learn, OpenAI API), ETL workflows, data analysis, and cloud deployment on AWS. Passionate about solving real-world problems at the intersection of AI, data, and software engineering — precisely the work Magna's Smart Factory Solutions team is doing. Available for immediate joining.

EDUCATION

Master of Computer Applications (MCA) 2024 – 2026

JAIN (Deemed-to-be University), Bengaluru | GPA: In Progress

Bachelor of Computer Applications (BCA) 2021 – 2024

University of Calicut, Kerala

TECHNICAL SKILLS

Languages	Python, JavaScript (ES6+), Java, Kotlin, Embedded C/C++
Frontend	React.js, HTML5, CSS3, Tailwind CSS
Backend	Node.js, Express.js, Django, REST APIs, JWT Authentication
AI / ML	OpenAI API, Scikit-learn (Random Forest, classification), Python data pipelines
Data & ETL	Pandas, data analysis, anomaly detection, Tableau dashboards, Excel reporting
Databases	MongoDB, MySQL, Firebase Firestore, SQL queries
Cloud & DevOps	AWS (EC2, Elastic Beanstalk, S3) – Certified SysOps Admin, Git, GitHub
Mobile	React Native, Flutter, Android (Kotlin)

KEY PROJECTS

TripMind – AI-Driven Smart Travel Planner | 2025

React Native, Node.js, Express.js, MongoDB, OpenAI API, JWT

- Integrated OpenAI API to generate personalized travel itineraries, hotel suggestions, and budget estimates — end-to-end AI feature development in a full-stack product
- Designed RESTful APIs for user management, trip planning, and AI recommendation workflows with optimized MongoDB queries
- Implemented JWT-based authentication and deployed backend on cloud with full production-environment configuration

IgniteHer – ML-Integrated Complaint Redressal Platform | 2024

Python, Django, MySQL, Scikit-learn (Random Forest)

- Integrated a Random Forest ML model to analyze complaint datasets, identify patterns, and generate actionable insights — direct AI/ML model integration into a full-stack web platform
- Built ETL-style data pipeline: complaint submission → processing → ML analysis → structured reporting
- Implemented role-based access control (RBAC) for multiple stakeholder types with clean, documented Python/Django code

Shield-X – IoT Smart Safety Wearable | 2026

ESP32, Embedded C/C++, Firebase IoT Cloud, Flutter, MPU6050, NEO-6M GPS

- Built real-time data pipeline using ESP32 and Firebase IoT Cloud for remote sensor monitoring and alert generation
- Processed accelerometer and gyroscope data with threshold-based logic to detect accidents and reduce false positives
- Developed Flutter mobile app for live data visualization, GPS tracking, and emergency SOS notifications

PawAmigo – Pet Playdate Finder App | 2025

Kotlin, Android SDK, Firebase Auth, Cloud Firestore, Glide

- Built Android app with real-time sync via Cloud Firestore; optimized UI with RecyclerView and Glide image loading

PRACTICAL EXPERIENCE

BCG – Generative AI Job Simulation (Forage) | 2025

- Built an AI-powered financial chatbot using Python and pandas to automate extraction and analysis of 10-K/10-Q corporate reports
- Generated structured, data-driven financial insights using rule-based AI processing — data engineering meets AI output

Deloitte Australia – Data Analytics Simulation (Forage) | 2025

- Performed data analysis and anomaly detection to identify trends and irregularities in real-world datasets
- Designed interactive Tableau dashboards supporting business decision-making; improved data accuracy via validation and classification

AWS APAC – Solutions Architecture Simulation (Forage) | 2025

- Designed scalable AWS cloud infrastructure using EC2 and Elastic Beanstalk; proposed cost-optimized deployment strategies
- Translated technical architecture into clear stakeholder communications — bridging engineering and business

Prodigy InfoTech – Web Development Intern | 2025

- Developed and deployed responsive web applications; used Git/GitHub for version control and collaborative workflows

CERTIFICATIONS

- AWS Certified SysOps Administrator – Associate (SOA-C02) | 2025
- Google Data Analytics Professional Certificate – Coursera
- BCG Generative AI Job Simulation – Forage | 2025
- AWS APAC Solutions Architecture Virtual Experience – Forage | 2025
- Deloitte Australia Data Analytics Simulation – Forage | 2025

RELEVANT COURSEWORK

Machine Learning • Data Structures & Algorithms • Database Management Systems • Operating Systems • Computer Networks • Object-Oriented Programming • Software Development Life Cycle • Web Technologies

ADDITIONAL INFORMATION

Availability: Immediate joining | Full-time, on-site (Bengaluru)

Languages: English (Fluent), Malayalam (Native), Hindi (Basic), Tamil (Basic)
