SUMMARY

Full Stack Developer with hands-on experience building scalable web applications using React.js, Node.js, Express.js, MongoDB, and MySQL. Skilled in developing RESTful APIs, frontend interfaces, authentication systems, and cloud-deployed applications. Strong knowledge of JavaScript, HTML5, CSS3, Git, and full-stack application architecture. Experienced in Agile-based project development and collaborative software engineering practices. Experienced in Full Stack Development, REST API development, frontend engineering, and backend application architecture.

EDUCATION

Master of Computer Applications (MCA)
JAIN (Deemed-to-be University)

Bachelor of Computer Applications (BCA)
University of Calicut

PRACTICAL EXPERIENCE

Prodigy InfoTech – Web Development Intern | 2025

- Developed responsive web applications using HTML, CSS, and JavaScript.
- Built and deployed projects including a weather app, stopwatch, and portfolio website.
- Improved UI responsiveness and user experience through DOM manipulation and performance optimization.
- Utilized Git and GitHub for version control and collaborative development.

BCG – Generative AI Job Simulation (Forage) | 2025

- Developed an AI-powered financial chatbot using Python and pandas to analyze corporate financial reports.
- Automated extraction and interpretation of 10-K and 10-Q data, improving data analysis efficiency.
- Generated structured, user-friendly financial insights using rule-based processing logic.

Deloitte Australia – Data Analytics Simulation (Forage) | 2025

- Performed data analysis and anomaly detection to identify trends and irregularities in datasets.
- Designed interactive Tableau dashboards to support business decision-making.
- Improved data accuracy through validation, classification, and structured reporting using Excel.

AWS APAC – Solutions Architecture Simulation (Forage) | 2025

- Designed scalable cloud architecture using AWS Elastic Beanstalk for application deployment.
- Proposed cost-optimized infrastructure solutions aligned with performance and scalability needs.
- Translated technical architecture into clear, business-oriented communication for stakeholders.

TECHNICAL SKILLS

Languages: JavaScript, Python, Java

Frontend: React.js, HTML5, CSS3,

Backend: Node.js, Express.js, REST API Development, JWT Authentication

Mobile Development: React Native, Android (Kotlin)

Database: MongoDB, MySQL, Firebase

Cloud & DevOps: AWS, Git, GitHub, CI/CD Fundamentals

Other: REST APIs, API Integration, AI Integration (OpenAI API), Debugging, SDLC, Problem Solving

CERTIFICATIONS

- AWS Certified SysOps Administrator – Associate (SOA-C02) |2025
- Google Data Analytics Professional Certificate – Coursera
- BCG – Generative AI Job Simulation – Forage
- AWS APAC – Solutions Architecture Virtual Experience – Forage
- Deloitte Australia – Data Analytics Job Simulation – Forage

PROJECTS

TRIPMIND – AI-Driven Smart Travel Planner

React Native, Node.js, Express.js, MongoDB, OpenAI API

- Developed a full-stack travel planning application using React Native, Node.js, Express.js, and MongoDB.
- Designed and consumed RESTful APIs for user authentication, trip management, itinerary generation, and recommendations.
- Implemented JWT-based authentication and authorization for secure user access.
- Optimized MongoDB queries to improve backend performance and response times.
- Integrated OpenAI API for AI-powered itinerary generation and travel recommendations.
- Utilized Git and GitHub for version control and collaborative development.
- Applied modular application architecture principles for scalability and maintainability.

SHIELD-X – IoT-Based Smart Safety Jacket

ESP32, Embedded C/C++, MPU6050, NEO-6M GPS, Firebase IoT Cloud, Flutter

- Built an IoT-enabled wearable system for real-time rider monitoring and accident detection.
- Implemented sensor data processing using accelerometer and gyroscope data with threshold-based logic to reduce false positives.
- Developed a real-time data pipeline using ESP32 and Firebase IoT Cloud for remote monitoring and alert generation.
- Built a Flutter-based mobile app for live sensor data visualization, GPS tracking, and emergency notifications.
- Designed an SOS alert system to transmit real-time location data to predefined contacts during emergencies.
- Developed REST-based communication between mobile application and cloud services.

IGNITE HER – Complaint Redressal Platform

Python, Django, MySQL, Scikit-learn

- Developed a secure full-stack web application using Django and MySQL with role-based access control (RBAC).
- Built an end-to-end complaint lifecycle: submission, tracking, reporting, and data management.
- Integrated a Random Forest model to analyze complaint patterns and generate actionable insights.

PAWAMIGO – Pet Playdate Finder

Kotlin, Android SDK, Firebase (Auth, Firestore), Glide

- Developed an Android app enabling pet registration, scheduling, and nearby user discovery.
- Implemented Firebase Authentication and Cloud Firestore for real-time sync and secure access.
- Improved UI performance using RecyclerView and optimized image loading with Glide.

COURSEWORK

Data Structures & Algorithms (DSA)
Database Management Systems (DBMS)
Operating Systems
Object-Oriented Programming (OOP)
Software Development Life Cycle (SDLC)
Web Technologies
Machine Learning
Software Engineering
Agile Software Development

ADDITIONAL INFORMATION

- **Location:** Bengaluru, Karnataka, India
- **Languages:** English (Fluent), Malayalam (Native), Hindi (Basic), Tamil (Basic)
- **Availability:** Open to full-time roles and immediate joining
